Travis Carpenter

Software Developer | Technical Support | Hands-On Technician

Prospect, PA • (724) 421-5946 • travis123tc@outlook.com • Portfolio • GitHub • Website

SUMMARY

Technical problem-solver with a B.S. in Game Programming and Development, a commercial game shipped on Steam, and IT support experience at a managed service provider. Strong in C#, C++, logic, and troubleshooting. Mechanically inclined and quick to learn new equipment, software, and processes.

SKILLS

Programming: C#, C++, GML, object-oriented programming (OOP), debugging, Git, Visual Studio, command line

Game Development: Unity, Unreal Engine 4/5, GameMaker, gameplay systems, enemy AI, state machines

IT & Technical: Tier 1 help desk, Autotask PSA, remote support, hardware/software troubleshooting, networking

Hands-On: Hand and power tools, assembly, automotive maintenance, quality inspection, workplace safety

Math & Tools: Linear algebra, calculus, physics, 3D math, robotics, Blender, Photoshop, Audacity, MS Office

EXPERIENCE

Founder & Independent Game Developer | Gamerev Games 2018 – Present

- Design, program, and publish games solo and collaboratively, from prototype through Steam release.
- Build gameplay systems, enemy AI, and procedural mechanics; profile and optimize for performance.
- Run playtests and iterate on feedback; produce devlog videos and manage the studio's online presence.

IT Support Intern | Think3 Technologies (Managed Service Provider) Mar 2026 – Jul 2026

- Provided Tier 1 remote and phone support to business clients, managing tickets in Autotask PSA.
- Resolved hardware, software, account access, and network connectivity issues; escalated complex cases.

Automotive Detailer | Diehl Automotive 2019 – Present

- Recondition vehicles to dealership standards using pressure washers, polishers, and extractors.
- Coordinate with the team on lot organization and vehicle flow to meet daily turnaround goals; 7 year tenure.

PROJECTS

Custom Command-Line Operating Environment | GameMaker, Unity (C#) Released

- Built a mock OS with a command parser, virtual file system, multi-window GUI, and process management.
- Engineered a custom scripting language and interpreter with variables, functions, arrays, and file I/O.

Blade of Jinshu | Commercial release on Steam | Unity (HDRP), C# Released

- Architected a customizable combo system, special attacks, time-dilation mechanics, and enemy AI.
- Developed loot, skill tree, and automatic save systems.

EDUCATION

B.S. Game Programming and Development | Southern New Hampshire University 2025

Coursework: C++ .NET Development, Application Development, Artificial Intelligence, Robotics Systems, Linear Algebra, Calculus, 3D Mathematics, Game Environment Design, Gameplay Systems
